JOURNAL OF IMMUNOGENETICS

VOLUME 7, 1980

EDITOR

K. BAUER Heidelberg

EDITORIAL BOARD

Honorary Member: RUTH SANGER London

Chairman: B. CINADER Toronto

Associate Editors:

K. BERG Oslo
H. H. FUDENBERG Charleston
H. FESTENSTEIN London
J. J. van ROOD Leiden

Co-Editors:

M. ADINOLFI London
S. ISEKI Tokyo
D. B. AMOS Durham
J. J. MARCHALONIS Charleston
H. BALNER Rijswijk
R. McBRIDE Houston
C. COHEN Bethesda
G. F. MITCHELL Melbourne
CH. DAVID Rochester
A. MUNRO Cambridge
D. A. L. DAVIES High Wycombe
J. B. NATVIG Oslo
J. H. EDWARDS Oxford
O. PROKOP Berlin
V. P. EIJSVOOGEL Amsterdam
G. M. SHEARER Bethesda
K. FURUKAWA Maebashi
G. F. SPRINGER Evanston

CONTENTS

NO. 1, FEBRUARY

P. DEMANT and H. FESTENSTEIN. Editorial. Histocompatibility antigens, tumours and viruses 1

W. SCHMIDT and H. FESTENSTEIN. Serological and immunochemical studies of H-2 allospecificities on K36, a syngeneic tumour of AKR 7

C. TESTORELLI, O. MARELLI, W. SCHMIDT and H. FESTENSTEIN. Changes in H-2 antigen expression on a murine spontaneous leukaemia (K36) detected by cell-mediated cytotoxicity assay 19

M. IMAMURA and W. J. MARTIN. Variable expression and immunogenicity of an H-2K-coded alloantigen on murine tumours 31

ALINA CZARNOMSKA and JANA CAPKOVA. Change of H-2 antigens expression on mouse leukaemia LBN/a-2 and LBN/b-3 in the course of serial transplantation 39

V. SCHIRRMACHER, F. GARRIDO, F. GARCIA-OLIVARES, M. PEREZ and M. DOLORES TORRES. Expression of foreign H-2-like antigens by a chemically-induced murine tumour (MCG4) 51

JANET M. ROMAN and B. BONAVIDA. Inappropriate alloantigen-like specificities detected on spontaneous and transplantable reticulum cell sarcomas of SJL/J mice 61

S. FERRONE, M. A. PELLEGRINO and G. N. CALLAHAN. Human and murine tumours: changes in cell surface structures coded by the major histocompatibility complex region 71

D. MERUELO. H-2D control of leukaemia susceptibility: mechanism and implications 81

P. IVANYI, P. VAN MOURIK, M. BREUNING and C. J. M. MELIEF. Unexpected lympho-cytotoxic reactions of anti-H-2 sera on normal lymph-node cells: are they due to altered H-2 structures or anti-viral antibodies? 91

A. MATOSSIAN-ROGERS, L. DE GIORGI and H. FESTENSTEIN. H-2^d-like specificities on Gardner (H-2^k) tumour detected in a restricted anti-tumour reaction 99

A. VAZQUEZ, ANNA SENIK, W. H. FRIDMAN and CATHERINE NEAUPORT-SAUTES. Public H-2 specificities are target determinants for alloreactive cytotoxic T lymphocytes 107

NO. 2, APRIL

J. P. SALIER, L. RIVAT, M. DAVEAU, G. LEFRANC, P. BRETON, C. H. DE MENIBUS, A. HENOCQ and H. H. FUDENBERG. Quantitative studies of Gm allotypes. V. Simultaneous presence of latent *Gm* genes in a family with hypogammaglobulinaemic probands 123

S. YAZAWA and K. FURUKAWA. α-L-fucosyltransferases related to biosynthesis of blood group substances in human saliva 137

P. R. DESAI and G. F. SPRINGER. Sialylation of Thomsen-Friedenreich (T) and blood type NM antigens by transferases in human sera measured by [^{14}C]NAN uptake 149

T. J. GILL III and H. W. KUNZ. The role of regional differences in the major histocompatibility complex in the production during pregnancy of a serum factor inhibiting macrophage migration 157

M. BELVEDERE, M. A. PELLEGRINO and S. FERRONE. Xenoantisera to DRw allospecificities 167

W. K. SIEBER JR, DIANE K. WAGENER, T. J. GILL III, H. W. KUNZ and G. E. EDDEY. The effect of maternal responder status on the genetic control of the antibody response 173

K. NAKANO and B. CINADER. A strain survey of age-dependent changes in antigen elimination, antibody formation and tolerance 183

SHORT COMMUNICATION

B. HABIBI, P. PERRIER and C. SALMON. HD50 assay evaluation of the antigen Fy3 depression in Fy^x individuals 191

NO. 3, JUNE

OBITUARY. Alena Lengerova 195

G. W. LITMAN, CHRISTI SCHEFFEL and BONNIE GERBER-JENSON. Immunoglobulin diversity in the phylogenetically primitive shark, *Heterodontus francisci*. I. Suggested lack of structural variation between light chains isolated from different animals 197

G. LEFRANC and MARIE-PAULE LEFRANC. Discontinuous genes and DNA sequence transposition: a model for immunoglobulin chain synthesis 207

MARIACLARA BELVEDERE, PATRICIA RICHIARDI, M. A. PELLEGRINO and S. FERRONE. Fab_2 fragments from HLA xenoantisera specifically block cytolysis mediated by HLA-A,B alloantisera 215

V. HOLÁŇ, I. HILGERT, JITKA CHUTNÁ and M. HAŠEK. The regulatory role of I-J subregion in neonatal tolerance induction to H-2D alloantigens ... 221

E. M. SHEVACH, A. F. GECZY, A. DE WECK and B. D. SCHWARTZ. The guinea-pig I-region. III. Distribution of Ia antigens in inbred and partially inbred strains 229

T. W. JUNGI and D. D. MCGREGOR. Allogeneic restriction in the rat: genetic basis of restriction of the T cell mediators of delayed-type hypersensitivity and antimicrobial resistance to *Listeria monocytogenes* 243

B. DE JONG, G. J. P. A. ANDERS, I. H. VAN DE MEER, J. ZIJLSTRA and J. WIERDA. Genetics of Chinese hamster mixed lymphocyte reactivity 261

S. M. HEDRICK and J. D. WATSON. Genetic control of the immune response to collagen. I. Quantitative determination of response levels by multiple I-region genes 271

NO. 4, AUGUST

ERNA VAN LOGHEM, R. I. SUKERNIK, L. P. OSIPOVA, B. J. M. ZEGERS, H. MATSUMOTO, GERDA DE LANGE and G. LEFRANC. Gene deletion and gene duplication within the cluster of human heavy-chain genes. Selective absence of IgG sub-classes 285

R. NORDHAGEN, B. OLAISEN, P. TEISBERG and T. GEDDE-DAHL JR. Association between the electrophoretically-determined *C4M* haplotype product and partial inhibition of anti-Ch^a 301

M. SPITZ, L. FAINBOIM and A. VAN LEEUWEN. A new genetic marker of human T lymphoid cells detected by a xenogenic monoclonal antibody 307

TH. H. VAN DER KWAST. H-2-restricted recognition of minor histocompatibility antigens in delayed type hypersensitivity 315

T. SHIROISHI and K. MORIWAKI. Genetic regulation of the expression of H-2K.5 antigen on erythroid cells by H-2K end 325

J. H. ROGERS, W. VAN VREESWIJK and H. BALNER. The major histocompatibility complex of rhesus monkeys. XIII. Current knowledge of DR and other B-cell specific antigens 333

ANNE-MARIE HEUMANN and C. STIFFEL. Tolerance induction in mice selected for high or low antibody responsiveness 349

NO. 5, OCTOBER

R. H. NOTENBOOM, C.-T. CHOU, P. W. GOOD, S. DUBISKI, B. CINADER and G. KÖHLER. Isolation and characterization of a mouse-rabbit hybridoma 359

F. SHAKIB and D. BARR. The incidence of Gm allotypes in a group of Iraqi Arabs 369

T. KOGURE and K. FURUKAWA. Detection and activity of blood group *B* gene-associated α-galactosyltransferase in human urine 375

B. N. ROBINSON, D. F. ROBERTS, B. A. MATHER, R. NELSON and A. S. ROWLATT. Coeliac disease and HLA: a family study 381

GILLIAN M. MORGAN and I. F. C. MCKENZIE. Cell membrane alloantigenic determinants of several unusual mouse strains 393

G. O. KLEIN, K. KÄRRE, G. KLEIN and R. KIESSLING. The genetic regulation of congenic mice with B10 or AKR background 401

H. SNIPPE, B. MERCHANT, E. LIZZIO and J. K. INMAN. Functional antigen binding by the defective B cells of CBA/N × C3H/HeN F_1 male mice 409

G. M. MORGAN, I. F. C. MCKENZIE, J. GODING and R. MELVOLD. *Ir* gene testing in H-2 mutants 421

CAROLYN K. DRESCHER, PATRICIA JARGIELLO, T. J. GILL III and H. W. KUNZ. Analysis of the Giemsa-banding patterns of the chromosomes from rats carrying the genes of the growth and reproduction complex (GRC) 427

NO. 6, DECEMBER

S. K. KUNDU, A. EVANS, J. RIZVI, H. GLIDDEN and D. M. MARCUS. A new P^k phenotype in the P blood group system 431

E. OHAYON, A. DE MOUZON, G. HAUPTMANN, J. KLEIN, M. ABBAL, J. CONSTANS, S. MAYER and J. DUCOS. High frequency of the properdin factor Bf F1 and its link to HLA in French Basques 441

Y. MIZUSHIMA, F. SENDO, N. TAKEICHI and H. KOBAYASHI. Non-H-2-linked genetic control of resistance to BALB/c fibrosarcaoma Meth-A 447

P. DRÁBER, J. ZIKÁN and MARTA VOJTÍŠKOVÁ. Establishment and characterization of permanent murine hybridomas secreting monoclonal anti-Thy-1 antibodies 455

P. ANKER, D. JACHERTZ, M. STROUN, RENÉE BRÖGGER, CHRISTINE LEDERREY, JACQUELINE HENRI and P. A. MAURICE. The role of extracellular DNA in the transfer of information from T to B human lymphocytes in the course of an immune response 475

K. ŠŮLA, P. DRÁBER and K. NOUZA. Addition of serum to the medium used for preparation of cell suspensions as a possible source of artifacts in cell-mediated reactions studied by means of the popliteal lymph node test 483
